

## UAE to be EGM's Mena hub

(Wam)

8 January 2012

ABU DHABI — Germany's EGM Environmental Solutions announced that it has chosen the UAE as a centre of its operations in the Middle East and North Africa, or Mena, and named Abdullah Mangoosh as regional manager.

Wolfgang Gesen, chairman of the Papenburg-based EGM Environmental Solutions, said in a Press statement: "The decision to make the UAE as a base for our operations in MENA springs out of the dynamic international role the UAE is playing in conservation of the environment and introduction of forward-looking international environmental policies, particularly in health safety and the environment (HSE). The UAE has also assumed instrumental role in coordinating international efforts to reduce carbon dioxide (CO2) emissions and to generate and use environment-friendly energy." Mangoosh said he was extremely impressed with the German group's selection of the UAE as a centre for its operations in the MENA.

He noted that the UAE has always been at the forefront in environmental issues as many government related entities have been working diligently to reduce greenhouse gas emissions and improve the environment.

He added: "The new centre in the UAE will provide a new ideal springboard and gateway to the region and the world at large and it will advance international collective efforts towards improving our environment and generating clean energy." Mangoosh asserted the UAE will be a base for creative environmental technologies and solutions and a trade hub for enhanced environment-friendly fuel. —
